SUMMARY

AI Automation Engineer & Workflow Architect specializing in bridging the gap between LLM capabilities and production-ready business logic. Expert in building autonomous agents, secure API orchestrations (OAuth 2.0), and self-healing monitoring pipelines. Proven track record of driving a 40% revenue increase through workflow optimization and stabilizing multi-platform campaigns.

PROFESSIONAL EXPERIENCE

AgentGenius.ai | *AI Automation Engineer (Contractual)*

Mar 2026 – Present

- **Workflow Orchestration & Revenue Growth:** Refactored email outreach infrastructure, resulting in a **40% increase in sales volume** within one week.
- **Autonomous Infrastructure:** Engineered a 24/7 uptime monitoring pipeline using **n8n, GitHub Actions, and Playwright** to safeguard an e-commerce platform with 1,000+ MAU.
- **API Security & CRM Integration:** Architected secure **OAuth 2.0 connections** between n8n and HubSpot, configuring real-time webhooks for lead synchronization.
- **Intelligent Agent Logic:** Developed a "Human-in-the-Loop" **Kill Switch** workflow that autonomously pauses AI drafting and flags leads for manual action upon meeting booking.
- **AI Content Engineering:** Built a metric-based AI Campaign Generator for TikTok, FB, and Instagram, stabilizing posting consistency across diverse ecosystems.
- **Technical Leadership:** Managed a team of 3 for dashboard QA; authored technical documentation for API credit management and procurement.

Aretex | *Data Operations Intern*

Jan 2026 – Apr 2026

- **Data Integrity:** Managed high-volume data entry and validation tasks, ensuring 100% accuracy in client records and database maintenance.
- **Process Familiarization:** Gained foundational exposure to corporate data workflows and standardized reporting protocols.

KEY PROJECTS

FlowSentinel — AI-Assisted Reliability & Incident Classification Engine

2026

- Built an external workflow reliability engine using **n8n, Supabase, and OpenAI** to classify failed workflow executions through deterministic logic with AI fallback analysis.
- Implemented webhook-based incident ingestion, operational telemetry persistence, ownership-aware escalation routing, and automated email incident notifications.

AI Campaign Generator & Nudge System

2026

- Engineered a proactive "Nudge" system for chatbot logging to maintain user engagement through automated re-engagement triggers.

SKILLS & CORE COMPETENCIES

- **Languages & Frameworks:** Python, PHP, JavaScript (ES6+), HTML/CSS, Node.js, Express.js, React.
- **Automation & Infrastructure:** n8n, Playwright, LLM Orchestration, RESTful APIs, Webhooks, GitHub Actions.
- **Security & Databases:** OAuth 2.0, PostgreSQL (Neon), MongoDB, Supabase, Linux Essentials, AI-Driven QA.

EDUCATION

Bachelor of Science in Information Technology | Partido State University

2022 – 2026

- **Dean's Lister:** Awarded during 3rd Year (1st & 2nd Semester) for exemplary academic performance.
